

Read what our clients are saying about Health Care Relocations...

I just wanted to let you know that the HCR movers who helped NOAA in Hawaii move from Hawaii Kai to our new offices on Ford Island at the IRC did an outstanding job!! They went above and beyond to make the move as easy and smooth as possible and just want to acknowledge their great work! *Jason Leonard, Field Operations Coordinator*

...When it was time to start our move, it became obvious to me how experienced HCR was at doing big moves. The relocation of our equipment, furniture and consumables went according to plan and seamlessly from the department's point of view ... I have to say that nothing was ever a problem to any HCR staff member and I gladly say that I think "that you guys are the best!" *John Anderson, Director - Medical Imaging*

...HCR's knowledge and experience in transporting specialised laboratory equipment was invaluable. The equipment provided to transport items was excellent. The speed and efficiency of the HCR team in moving equipment was exceptional. One aspect worth noting during the move phase was effective communication. Contact was maintained between all relevant parties located across two campuses. *Gregory Bryson, Scientific Project Manager*

The leadership and staff from Health Care Relocations went above and beyond to accommodate the needs of hospital staff throughout the entire move process. HCR is committed to ensuring staff were aware of the move processes and what to expect created confidence and reduced anxiety among hospital staff as they prepared for the move. *Kara Ronald, Director Professional Practice for Health Disciplines*

...HCR served as an outstanding resource. Your team provided excellent leadership in ensuring all details were planned in the face of what seemed like a daunting task. As the move progressed, the consistent message from our staff was that your team was professional, polite, efficient and extremely competent. Many remarked that the move in their area was the smoothest they have ever experienced. *Elizabeth Cotton, Construction Management*

The move was a great success - a result of detailed planning, good communication, collaboration among multiple teams, and most of all, having the right company for the relocation process...HCR really know how a move works in a healthcare environment and they have a system that is very efficient & impressive. I highly recommend HCR to anyone who needs a guaranteed, successful relocation. *Sheon P. Lynch, Transition Management*

It was clear for our initial meeting with HCR that the team was staff and patient focused. That is what made HCR stand out. HCR's primary focus was not just about moving items. It was about moving the patient care environment. The HCR team was key in managing anxiety of leaving the familiar and arriving at the new. The result being business as usual on a day that was nothing but. *Sicy Simoes, Project Manager - Facilities Management*

... From our first meeting, HCR personnel quickly gained the trust and confidence of our staff ...I had the privilege of working with Health Care Relocations in 2004 and have also observed their work on two other occasions. As such I was familiar and comfortable with their approach, however moving dementia residents can present unique challenges...HCR staff were professional, helpful and unobtrusive...our dementia residents stayed calm and stress free. In fact, the experience was so great, I've hired them again! *Marsha Pyke, Project Manager*

... HCR was pivotal in our transition. They met the contractual obligations ...We were able to move on time with no unanticipated shut down of services. HCR was fantastic, knowledgeable, professional, great at conflict resolution, timely, honest, accommodating, and responsive! *Commander Cather NC USN, Base Transition Lead*

...WOW I was so very impressed with your company's ability to manage the absolute magnitude of work the move from three hospitals to this new one was. I was really impressed by the preciseness of the schedule, the coordination of shippers and receivers, and the equipment used to transport was so clean and uniform...On top of everything else you were doing, you remembered people's names, their location, and had a good idea of where they were going...AWESOME! *Wendy Degagne, Assistant to Project Manager*

We were very pleased at how well the move went, thanks to the hard work and cooperation of many individuals, including your team. Your assistance during this move was critical to ensuring its success and that we were ready to provide a great patient experience on Day 1 for our patients. *Sue Matthews, Interim President & CEO*

Your firm was selected as through a public call for proposals and you delivered on all aspects in your proposal, living up to the references we received that essentially told us we would not regret our decision to hire HCR; we never have regretted our choice. We consider ourselves a demanding client, and your attention to our needs, including your advice when you thought we were heading down the wrong path, based on your experience meant that our moves consistently went smoothly and efficiently with patients and staff safely and comfortably accommodated. *Chris Pickard, Director - Capital Planning, Project Management & Facilities*

Your meticulous planning and outstanding execution was note and admired by both clinical and administrative staff. We deeply appreciate the quality of your work. Especially noteworthy was the professionalism of your staff and their can-do attitude when called upon to do things beyond what was expected of them. Their concern for our patients' safety and comfort during the move was simply outstanding. *Sharon Krumm, Administrator*

We are convinced that we could not have come anywhere close to the success and ease of transition if we had attempted to handle this on our own. We specifically want to mention how impressed we were with the degree the HCR team came to know our facility, not just the bricks and mortar but also us as a hospital family. The planning process was easily integrated into everything else ...the documents provided helped with planning individual department moves and decreased uneasy moments. The most common remarks we hear is how easily and quickly each individual move was able to be accomplished. We admire your organization and the results you are able to achieve...*Christine Rizzo, Director & Anne Zimmerman, Chief Nursing Officer*

...I was pleasantly surprised at how efficient and well organized the HCR team was ...the clear communication within the team and us was great. Our educational chemistry labs were scheduled to be moved over a five day period. Through your teams exceptional efforts, work ethics and eagerness the move was completed a day ahead of schedule despite the obstacles that came their way, including no access to the elevators for ½ day!
Wendy Wade, Educational Lab Technologist
